DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 19,21,22,24-26 are rejected under 35 U.S.C. 102(b) as being anticipated by Davy (U. S. Patent no. 4,061,213).

See figure 1 rotor friction portion 18, neck portion 16, neck extension 23, exciter 19, sensor 22. Exciter may be formed integrally or as a separate piece (see column 3 lines 22-26).

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 1,3,4, 6-10, and 13,14 16,17, are rejected under 35 U.S.C. 103(a) as being unpatentable over Davy.

Davy is relied upon as above. Davy discloses a disc brake but not the specific type of disc brake. The examiner take official notice that air disc brakes are well known types of

Application/Control Number: 10/792,216

Art Unit: 3683

brake actuators and are commonly in use on heavy vehicles. It would have been obvious to one of ordinary skill in the art at the time the invention was made to use an air disc brake with the device of Davy as such is merely a design choice and does not affect the operation of Davy.

5. Claims 11,12, and 28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Davy in view of Frigger (U. S. Patent no. 3,716,121).

Davy is relied upon as above in paragraph 6. Davy does not teach the specific mounting structure of the sensor. Frigger teaches placing the sensor on the bracket attaching the caliper to the axle. (see figure 4 bracket 18, sensor 17). It would have been obvious to one of ordinary skill in the art at the time the invention was made to mount the sensor on the bracket attaching the caliper as taught by Frigger in the device of Davy in order to reduce the need for a separate bracket which increases the number of parts, the

Response to Arguments

weight of the vehicle, and the complexity of assembly.

6. Applicant's arguments filed 1/22/07 have been fully considered but they are not persuasive. Applicants argue that Davy discloses the ring attached to the brake rotor and not the neck portion of the brake rotor. The examiner is unclear at the distinction since the ring is in the exact same relative location as the instant invention.

Note that claim 19 uses functional language "adapted to" so that the sensor is merely required to be capable of being located in the disclosed position.

Art Unit: 3683

The examiner further notes that applicant has not seasonably challenged the Official notice of the examiner in paragraph 4 and therefore, it is considered admitted prior art.

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
